Make sure your Autocad is connected to internet. Copy /res/gears.ico and paste it on the software main menu. Press Start/Run and search for "Gears". Select "Gears" and wait for the process to finish. Go to "Help" and go to "Gears Help" and save it to the application directory. Restart Autodesk Autocad. Open your "gears.ico" file and find the "autocad_icons" folder and copy it in this folder. Press on the icon of "Gears" and choose "Go to Autocad Help" from the menu that appear. Select "Gears Help" and save it in your application directory. Install Autodesk Autocad and activate it. Scout says something like this: What you can do: Open "Select Classes" and find the class you wish to do a class review. Click the class and a drop down will appear, select "Scout for Review" (the default) The interface for Scout for review looks like this: Click the "Press a button" button and you will be taken to a new page. Here you can select your desired class and select review: What to look for: Buddy count! Your main concern is to get as many buddies as possible, and a buddy count of 30+ means the quality is high. The higher your score the better the review. Quality: Scout will try to tell you what it thinks of your class, and you can use this to your advantage. If you see a negative review, you can use that to your advantage in your overall evaluation. If you have a positive review you can use that to back up your results. Demeanor: Scout tries to evaluate the class as a whole, but on the individual teacher level it also tries to determine how you interact with other students. The more you learn about a teacher, the more data that Scout will try to get, so don't be afraid to give a bit of information about yourself. Basics: Scout is trying to assess how well you did in the class, what you liked, what you didn't like and what you would do better next time. This is a very important point. Don't let this be

Please enable Javascript to watch this video A woman who was bullied as a child has invented a Christmas ornament to help others feel loved in the same way. Molly Orbenkoff said she started the process of creating the ornament after a powerful incident where she wasn't able to hold back tears. "It was when I was visiting my friends in Chicago and this man came up to me and said, 'You're really cute, you're really pretty, you're really pretty.'" Orbenkoff said the man told her, "But you don't know what you're getting yourself into." Orbenkoff was only a child when she experienced a sense of abandonment. She said those early experiences fueled her to create the ornament. "I just want to give the person who is in need of love a holiday ornament for them to have as a reminder that there is a lot of love out there," said Orbenkoff. She hopes the ornament will be a

symbol of hope and a sense of inclusion. "If they get it, they can put it on their Christmas tree and they'll feel loved," she said. Orbenkoff posted a video on YouTube, explaining the process of making the ornament. The ornament's handle is made out of an ink pen. The inside is made out of rubber, and there's a magnet that can be connected to a magnet-enabled doorbell. "I hope the person who is in need of love will receive the ornament in December, and they can feel it in their heart and know that somebody is thinking about them," said
