The code coverage metrics plugin will help you to see how much code is covered by test cases and helps to improve test coverage Currently it support code coverage through the class files and some libraries. The application will read custom test coverage files generated by the test execution. Coffeecup Code Coverage Description: The Coffeecup Code Coverage provider is built on top of the TestDriven.Net library and is embedded in the coffeecup samples. It reads test coverage data from source code in the TestDriven.Net.Coverage.DotNetSamples.Coffee and TestDriven.Net.Coverage.DotNetSamples.VB folders for both C# and VB.NET. Code coverage tests

Microblog Purple Full Version [Updated]

Microblog Purple improves the status window of the group chat software Libpurple. The status window of Libpurple is the window that show the conversations between several users. Its main goal is to show a text status of any user, any place and at any time. But it is also a good tool to advertise any news, attach images, video, whatever. Libpurple is a client software for all "purpose communication" so developers can start to build their own microblogging client. Libpurple Status Window Features: * Show the list of all the users currently in the chat * Show also the information about the last seen/mentioned user * The messages are classified by the type * Has ability to add new status types by installing a new protocol * Several protocol supported: Twitter, Identica, Status.net * The "Favorites" is an interactive popup that allow a quick change of the favorite status * The "Retweet" is an interactive popup that allow a quick change of the retweet status * The "Reply" is an interactive popup that allow a quick change of the reply status * The "Reply to All" is an interactive popup that allow a quick change of the reply status * The "Reply to User" is an interactive popup that allow a quick change of the reply status * The "Follow User" is an interactive popup that allow a quick change of the follow status * The "Delete User" is an interactive popup that allow a quick change of the delete status * The "Copy User" is an interactive popup that allow a quick change of the copy status Microblog Purple: Protocols Protocol Name: Twitter * Markup: lang="en", link="/url", name="twitter" *

Description: Microblog Purple is able to host a Twitter conversation. When a user click on the "Fav" button, the application search Twitter to check if there is a current conversation based on the name of the contacts or the keyword. If there is no conversation, it begins a new conversation with the selected contacts. When a user click on the "Retw" button, Microblog Purple uses the lists of favorite and followers links to find a conversation with the same preference and then send it to the last mentioned person. When a user click on the "Repla" button, Microblog Purple checks the lists of follow and lists of friends. It finds a conversation with the 09e8f5149f

Microblog Purple

About MySoftLab Since 2001 the world's most versatile OCR engine, OCR MySoftLab is designed to process scans in multi-format (PDF, TIFF, JPEG, etc.) and non-standard resolutions. It also supports a broad range of languages, including Arabic, Persian, and Korean. Quality OCR capabilities such as SNM can process up to 3000 pages per hour Document OCR, PDF OCR, Barcode OCR, Dynamic Text Extraction, Text Capture (Html, RTF, TXT,...) Para Recognition Speech recognition Authenticate documents Recover scanned documents OCR Engine SNM is an OCR engine designed to extract text information from selected pages of documents. It has been specifically designed to cover the most common situations that occur when processing scanned documents: contrast reduction minimal page flipping ignoring non printed areas dynamic text extraction OCR engine dynamic text extraction is a process consisting in the detection and extraction of the dynamic text elements from selected pages. SNM finds the various parts of a document such as logos, notes, tables, and dates, all automatically and without a user interaction. OCR Engine Barcode OCR Barcode Recognition is a process consisting in the detection and extraction of the specific information from a page or a line drawn on a page. SNM is able to process barcode images in formats such as JPG, TIF, PNG, etc. In addition to the reading and text recognition capabilities of SNM, there are tools to capture text and graphics from other types of documents (TXT, HTML, PDF, RTF). Text Exerpretion & Voice Recognition Text conversion from one language to another, the analysis of an original document written in one language and required an interpretation in another, is a classic operation in the field of data entry and data conversion. SNM has an interesting capability to let the user define the various formats of the incoming texts and select the appropriate format for the text conversion. Document Recovery Document recovery is a process consisting in the generation of a clean document from a corrupted one. The document is prepared manually by a professional without the need of extensive training. Highlight, mine and reformat the content and enable/disable pagination. How about some technical

What's New in the Microblog Purple?
